

Park West Clinic

CONTROLLED ACCESS AREAS IS  
ONE OF THE MOST FUNDAMENTAL  
ASPECTS IN THE SUCCESS OF A HYGENIC  
AND MODERN FACILITY.

## Park West Clinic

We would like to invite you to come and see  
for yourself the facility that we pride ourselves upon.  
This brochure contains a small taste of what  
you can expect to find at the Park West Clinic.

Use the card to book your demonstration.

Tel: (01) 612 0551 Email: [info@parkwestclinic.ie](mailto:info@parkwestclinic.ie) Web: [www.parkwestclinic.ie](http://www.parkwestclinic.ie)

We look forward to your call.

The Main reception is a spacious architecturally designed area with central patient check in facility.

Park West Clinic

# PREPARATION

## General Description

Our state of the art facility provides both the patient and the clinical user with distinct advantage in treatments and facilities from the main reception area through to the OR. The hospital has been designed and built to meet both national and international design standards for medical facilities including Health Text Memorandum and CEN standards. All equipment within the facility meets and exceeds both National & International rules for medical devices and medically used rooms. These facilities and their high design standards combine to provide a safe, professional and efficient patient treatment environment.

Instrument Sterilisation services are conducted on site with a dedicated facility. Instrument washers and Autoclaves are installed to meeting the rigid CEN standards and operated in keeping with best practices.

...the Operating Theatre...

The facility consists of two state of the art positive pressure HEPA filtered Operating Rooms...

...complete with Ceiling Mount Operating dual lights, Anaesthetic Pendants, Support equipment, Isolated Power Supplies, IS 340 and HTM compliant surfaces and services, Medical Gasses compliant to HTM 2022 and much more.

The Operating Rooms are serviced by a dedicated Induction Room and Scrub area, centrally located and abutting each Operating Room with direct access. The same high levels of equipping and services used in the Operating Rooms have been reflected throughout the induction and scrub areas.

The main Recovery area is a six bedded unit, including two high needs beds, with central Nurse's station.

RECOVERY

The main Recovery area is a six bedded unit, including two high needs beds, with central Nurse's station. Each bedside is equipped with a dedicated Nurse Call / Assistance button, power outlets and patient controlled lighting to augment ambient lighting. Finishes are to the highest standard providing a safe, secure and monitored recover area for the post operative patient.
